SPEIRS MAJOR

The product itself is robust, featuring a raw industrial aluminium base and contrasting crystalline diffuser. Whilst providing good shock resistance (IK10) this diffuser allows a high level of light transmission for the best possible performance.

Cells can be surface mounted or recessed on wall on ceilings, singly or arranged in groups connected together using standard conduit. Coloured inserts are available, offering the possibility to customise the look of the luminaire to harmonise with its environment or help create a brand statement.
